BULLSEYE TELECOM

VoIP

Looking for an all-in-one VoIP solution to take care of your communications needs? BullsEye Telecom has been helping enterprises do just that for over a decade.

Our voice network is powered by Cisco BroadSoft, a global communication software and service provider that connects workplaces worldwide. BullsEye has provided BroadSoft VoIP solutions since 2004; we know BroadSoft!

The BullsEye Way

Making the move to VoIP can be complex, but BullsEye makes it easy:

1. **Project management**
2. **VoIP readiness testing**
3. **Circuit and network remediation**
4. **Professional installation**
5. **24/7 ongoing support**

Each deployment starts with the best technical team in the industry. We know networks and how to identify issues before they are a big problem. Even better, we handle the installation from start to finish – so you don't have to.

The result? **100% successful installations.**

The BullsEye Difference

We're not the only VoIP provider — but our track record speaks for itself. A few clear differences bring unmatched value to our clients:

- Controlled POTS to VoIP migration for a seamless transition to better voice solutions
- Fully managed, hands-on installation so you don't have to lift a finger
- One provider to call – forget dealing with multiple vendors
- Broadband circuits that deliver the highest quality at an outstanding value

THE COMPLETE PORTFOLIO

- ✓ Hosted PBX
- ✓ Hosted BYOD – use existing phones you already own
- ✓ POTS over broadband
- ✓ IP PRI
- ✓ SIP trunking
- ✓ UCaaS

VoIP ADVANTAGES

- → Online management for better visibility on all end points
- → Mobility to empower your workforce
- → Scalable to easily adjust as your business changes
- → Best-in-class voice quality
- → Feature-rich to meet all of your communications needs
- → Disaster recovery to keep your data secure
- → Lower costs so you can allocate resources properly
