E-LAN

Multipoint Connectivity. Redefined

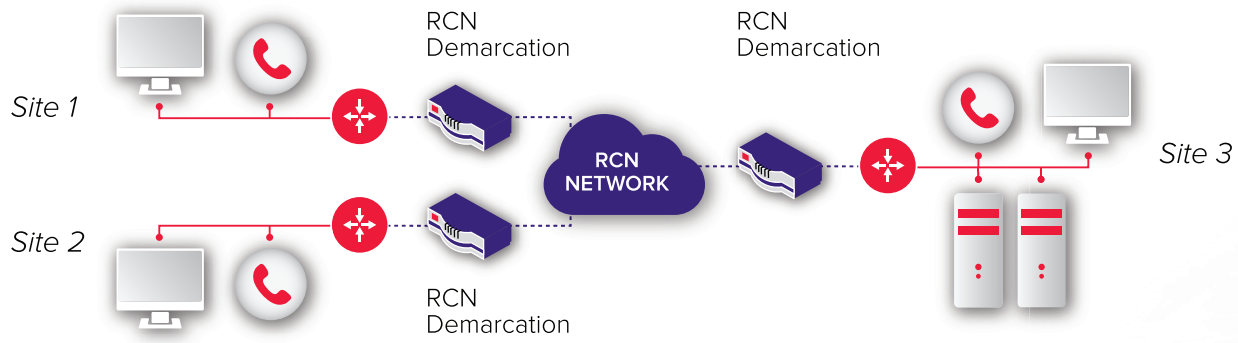
Enhanced network communications are critical to the success of any business organization with multiple locations. A reliable Ethernet-based network solution from RCN Business is an affordable and superior alternative to outdated frame relay, private line and data T1 offerings, delivering increased capacity, enhanced security and scalability.

E-LAN

For business organizations with multiple branches or satellite offices requiring multipoint connectivity, RCN Business offers **E-LAN** service, providing businesses with a transparent Layer 2 virtual LAN that can seamlessly connect multiple sites.

This cost-effective alternative to traditional network topologies offers businesses a more flexible and scalable network solution, connecting each location's premise equipment, enabling the transfer of data through a single Ethernet interface, with speeds up to 100 Gbps.

- Transparent multipoint service for centralized connectivity between multiple locations
- Seamlessly connect all business locations and employees on a single reliable network
- SLAs for availability, latency, packet loss and mean time to repair
- MEF CE 2.0 certified solutions available
- End-to-end network monitoring 24/7/365
- Dedicated local support



RCN Network

Data travels over RCN's own resilient, fiber-rich network, offering extensive fiber with redundancy and enhanced performance. Because of its robust network, service disruptions that are more likely to occur with older generation copper and TDM networks are minimized.

Partnership, Choice, Technology

With a variety of products, services and contract options available, RCN Business takes a consultative approach in developing a customized solution. A representative will identify communications needs and create a best-in-class solution.

RCN Business topped PC Mag's Business Choice Awards for 2016

Ranked highest for overall satisfaction. Best overall Internet service.
Highest ranking on value. And most likely to recommend.
