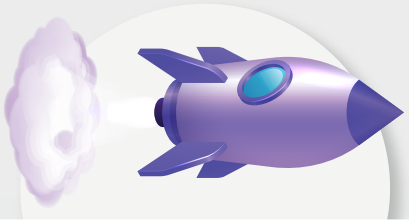
USE CASE: CxC Wireline to connect your business

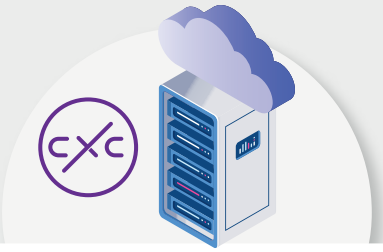
convergia
The PanAmerican Connectivity Company

Connectivity

1 Use CxC Wireline to fulfill your business requirements



Fast: Wireline can be used to create a connection that is high speed and low latency



Flexible: Wireline can be used to have a connection that is available any time and anywhere

Fortified: Wireline can be used to create a connection that is private, with end-to-end security

2 Integrate CxC Wireline into your infrastructure

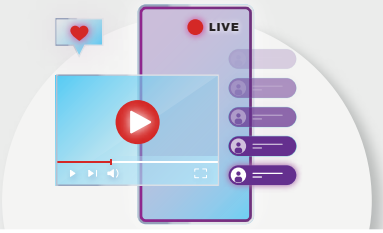
Easily connect various devices among your business, such as computers, printers, fax machines, etc.

Use CxC Wireline with CxC Router (or cellular router) and CxC Wireless Cellular SIM to have a backup connection without wires

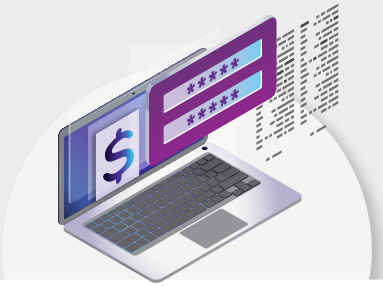
Wireline is reliable, use it to connect your most critical devices to ensure connectivity. It can also be used if you require high speeds and lots of data!

3 Any Industry use case

Retail: you can use Wireline to power your POS system to ensure that you are always able to conduct a sale



Entertainment: Through a Wireline connection you can create stream/webinars for your customers, without worrying about data usage or speed requirements



Banking: through wireline connectivity ensure your devices can fulfill customer demand while keeping their personal data safe
