DEDICATED INTERNET ACCESS

Fiber-Based Connectivity. Redefined

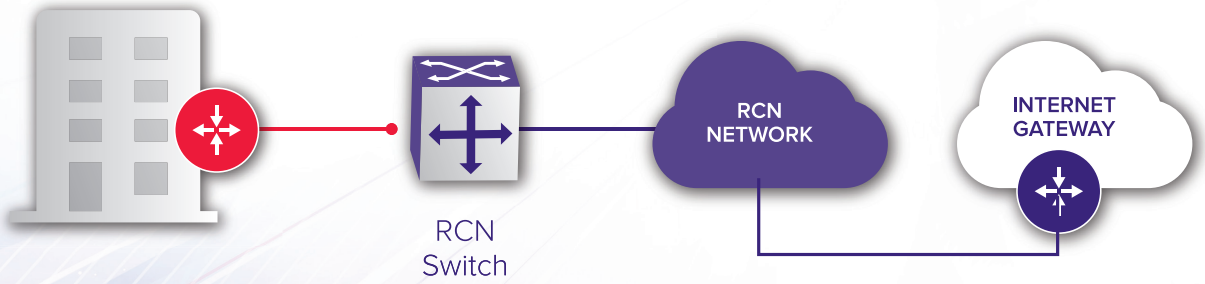
Maximizing productivity through enhanced communications is critical to the success of any business organization. RCN Business offers the advanced Ethernet-based communications solutions that businesses need, delivering the increased capacity, enhanced security, scalability and flexibility that can help businesses save money and be more competitive.

Dedicated Internet Access

For businesses requiring greater bandwidth with symmetrical upload and download speeds, businesses and organizations can rely on **Dedicated Internet Access** (DIA) provided by RCN Business.

RCN Business DIA provides a secure dedicated fiber-based connection between a business's Local Area Network (LAN) and the Internet. With connectivity speeds ranging from 10 Mbps to 100 Gpbs, a business can get the exact bandwidth they need to help them operate more efficiently, and save money.

- Scalable with symmetrical speeds up to 100 Gbps
- Highly peered backbone network with direct access to over 175 networks globally
- Performance monitoring tools
- SLAs for availability, latency, packet loss and mean time to repair
- End-to-end network monitoring 24/7/365
- Dedicated local support



RCN Network

Data travels over RCN's own resilient, fiber-rich network, offering extensive fiber with redundancy and enhanced performance. Because of its robust network, service disruptions that are more likely to occur with older generation copper and TDM networks are minimized.

Partnership, Choice, Technology

With a variety of products, services and contract options available, RCN Business takes a consultative approach in developing a customized solution. A representative will identify communications needs and create a best-in-class solution.

RCN Business topped PC Mag's Business Choice Awards for 2016

Ranked highest for overall satisfaction. Best overall Internet service.
Highest ranking on value. And most likely to recommend.
