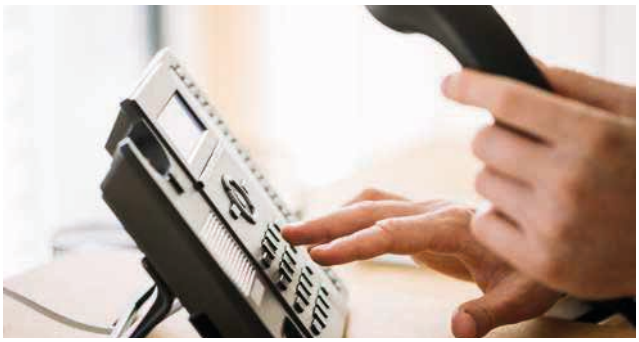
Voice

Patagonland, one of the most important real estate companies in Chile entrusted the handling of implementing a Hosted PBX solution to Convergia.

Due to connectivity problems at their Santiago branch, Patagonland needed to implement a high capacity dedicated Internet service to obtain more secure, stable and high-scale access.

As a result, Patagonland was able to solve their connectivity problem and transformed their business with Convergia's solutions. They now renew their current telephony service to Convergia's Hosted PBX and decided to digitally transform their business by migrating to Office 365.

Overall, Convergia was able to successfully transfer all Patagonland's services to their new office.


When working with Convergia, we offer our clients a complete solution and go the extra mile, from start to finish.
