Connectivity

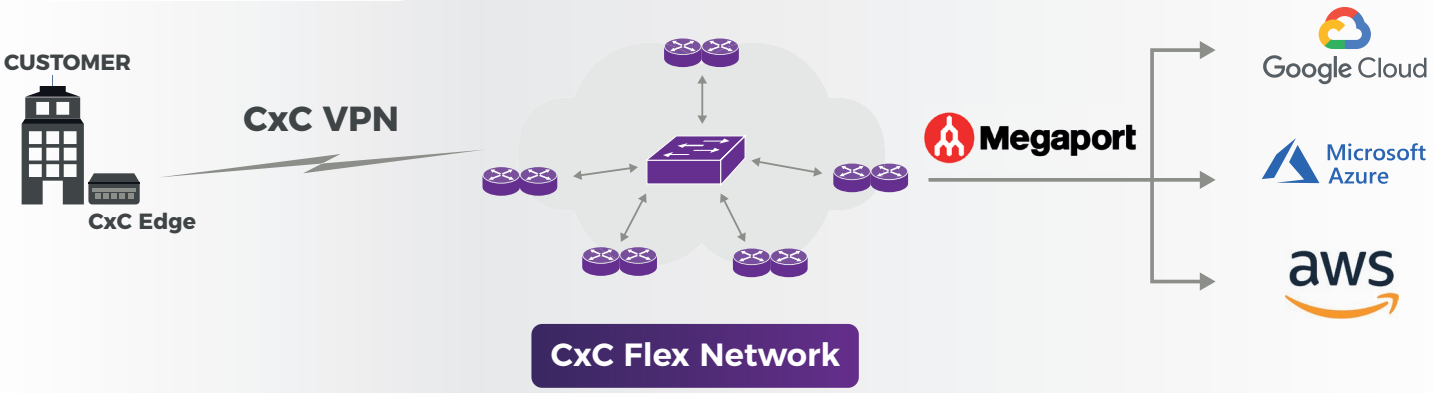
CxC Flex Dynamic

Fast, Fortified and Flexible Connectivity to the cloud

What is CxC Flex Dynamic?

Establish private connectivity through the use of a public internet connection with Convergia's services. With Convergia's VPN IPSec tunnels, which are dynamically connected to Convergia POPs, your data can be maintained securely.

How does it Work?



1. A direct connection to CxC Flex through the internet
2. The Internet carries all your data securely through a VPN tunnel
3. We connect directly to all major cloud providers

Connectivity by Convergia

Competitive Advantages

1 Faster Deployment

- All you need to reach any public cloud provider is a connection to the internet

2 Secure and Encrypted

- All the data is secured by using Convergia VPN IPSec tunnels dynamically connecting to Convergia POPs

3 Cost effective

- Using a public connection over the Internet greatly reduces costs

The Industries CxC Flex is best suited for:

Financial Industries

Deploying hybrid solutions and **transferring large amounts of transactional** data between Cloud applications and on-premises data repositories need the security and reliability of CxC Flex

Agroindustry

Business intelligence solutions **moving big data to the Cloud** needs the speed and the security of CxC Flex, so they can analyze the patterns that are hidden in the data and insure a better harvesting time

Health Sector

Capturing and processing lots of images and videos will achieve a time reduction during their upload, and their costs, thanks to CxC Flex higher **speed and no cost for uploads**

Insurance Companies

Managing large volumes of highly **classified information** will benefit from CxC Flex's superior level of security

Manufacturing Industries

Deploying big data applications with **video recognition to detect defective parts**, or delays in the processes will benefit from the speed and processing capacity of the cloud, and the reliability, and speed, of CxC Flex to upload the data
