Virtual Tour: Hurricane Electric's Fremont 2 Colocation Facility

Also see: Fremont 1 and San Jose

Building Entrance

Our 208,000 square foot Fremont 2 Colocation Facility is located in the heart of Silicon Valley with easy access from two major freeways (880, 680). Three international airports (SJC, OAK, SFO) are a short distance away. Our Fremont 1 Colocation Facility is located 1.5 miles north. Ample free parking is always available at our Fremont colocation facilities, convenient to the building entrance.

Front Desk Check-In

Our front desk staff allows entry to the facility only for authorized personnel; each person must bring a government-issued photo ID for each visit. A new photo is taken each time someone visits.

Security and Cameras

Our custom digital security camera system monitors all entries, hallways, and all areas of the lobby and colocation cabinet areas.

Access Control

Entry to the colocation areas requires an access card key.

Colocation Suites

A number of smaller suites provide extra privacy and access restrictions.

Overhead View of Suite 1200

Our newest build-out at the Fremont 2 Colocation Facility are Suites 1200 and 1300. Our huge data center has space for thousands of cabinets. Overhead ducts bring conditioned air to the cold aisles.
