Connectivity

CxC SIM

BUSINESS WIRELESS BROADBAND

Cellular data for your business-critical network requirements

For 20 years, Convergia adds value and reduces the complexity of your Connectivity requirements, providing "Always On" Connectivity for your business with combined wireline and wireless solutions

"Always-on" Primary connection

CxC SIM Business Wireless Broadband (CxC SIM BWB) provides a **cost-effective**, readily deployable connection to your **coverage qualified** branch or **remote offices**, where lack of wireline service or the high costs of deployment limit your options.

"Always-on" Active-Active

Establish an **active-active network** with business-critical and high-usage applications like public Wi-Fi and streaming services with the CxC SIM BWB, or the **CxC wireline connection**.

"Always-on" Failover

CxC SIM BWB packaged with your router or the CxC Digi router offers a **highly reliable internet option** that can serve your **day-to-day primary data needs**. It also functions as a secondary connection in the event your wireline primary connection fails. In the event of a wireline outage, your connections switch to your CxC SIM BWB enabled CxC Digi Router.

BENEFITS:

- Fast, highly reliable connections for business-critical applications
- Cellular Network prioritization in the event of cellular congestion
- Efficiently and effectively connect coverage qualified sites

CxC SIM Coverage Map

- 5G, 4G, LTE, CAT-M1, limited NB-IoT Data Coverage, 3G possible
- 5G, 4G, LTE and CAT-M1 Data Coverage, 3G possible
